

- Notes:**
1. All operatives to have up to date 'New Road Street Works Act' training.
 2. All traffic management will be set out using 'Safety at Street Works and Road Works' Code of Practice.
 3. Fully trained and competent banksmen to be in place for each item of plant, and all reversing maneuvers.
 4. Morrison Construction will be responsible for all traffic / pedestrian management.
 5. Regular checks will be made on all road signs / barriers to ensure the safety of the workforce / public and to avoid any confusion to road users.
 6. All work areas will be securely fenced off.
 7. As well as the road closures and major traffic management set ups detailed below, there will be minor traffic management set ups throughout the job, such as stop/go boards, road narrows etc.
 8. When the new system has been installed and tested, there will be a secondary traffic management set up at both locations on the High Street in March 2014 for 'Turn of Flows'. This will only be in place for 2-3 days.
